

Dear Cintas Hiring Team,

I am writing to apply for the Engineering Intern position (Requisition #224687) at your Milford, OH location. I am currently pursuing a Master of Science in Data Science (Business Analytics Track) at the University of West Florida, expected JULY 2026, and hold a bachelor's degree in computer science. With hands-on experience in data analysis, process improvement, and operational management, I am confident I can contribute meaningfully to your engineering teams from day one.

In my current role as an AI Engineering & Data Intern at the University of West Florida, I design financial dashboards and revenue forecasting reports using Tableau, Power BI, and Excel and I have built automated workflows that reduced manual reporting cycles across university operations. I am highly proficient in Microsoft Office (Excel, Word, Outlook), SharePoint, and Google Sheets, and I bring a disciplined approach to documentation, data collection, and reporting that aligns directly with the responsibilities outlined in this role.

Beyond technical skills, I have real operational management experience supervising a Service Desk team of 7–8 staff, leading 30+ recruitment and onboarding processes, and serving as the single point of contact between clients and development teams in a consulting capacity. I understand how to coordinate across teams, track deliverables, and communicate findings clearly to stakeholders at every level.

What draws me to Cintas is your scale and your commitment to operational excellence. Supporting over one million businesses requires exactly the kind of rigorous process thinking, data-driven decision-making, and cross-functional collaboration that I have been building throughout my academic and professional career. I would welcome the chance to apply these skills within your engineering environment and grow through the hands-on rotations and project work this internship offers.

Thank you for your time and consideration. I have attached my resume and am happy to discuss my qualifications further at your convenience.

Sincerely,

Shaheen Memon
