SKILLS

- **AI & LLM:** LLM API Integration (Claude, OpenAI), RAG Pipelines, Embeddings & Vector Search (FAISS), Prompt Engineering, AI Agent Development
- **Programming & Data:** Python, SQL, R, LangChain, JavaScript (MERN Stack), Excel VBA, Cursor (AI-assisted development)
- **Cloud & Infrastructure:** Microsoft Azure (Data Factory, Blob Storage, SQL Server, Resource Groups)
- **Analytics & Reporting:** Tableau, Power BI, KPI Dashboards, Forecasting, Excel
- **Project Management:** Agile/Scrum, Sprint Planning, MoSCoW, RACI, Jira, Taiga, Slack, SharePoint, MS 365

EDUCATION

M.S. Data Science – Business Analytics Track

University of West Florida (May 2026)

BSc (Hons) Computer Science

Leeds Beckett University (Jun 2024)

CERTIFICATIONS

AI Fluency: Frameworks & Foundations

Anthropic (2025)

AI Fundamentals

Amazon Web Services / AWS (2025)

EMPLOYMENT HISTORY

AI Engineering & Data Intern – University of West Florida (Jan 2025 – Present)

- Built and deployed **LLM-powered** automation workflows using **Python** and AI APIs, reducing manual reporting cycles across university operations.
- Designed and managed financial dashboards and revenue forecasting reports (Tableau, Power BI, Excel) for leadership decisions.
- Used **Cursor** and AI-assisted development tools to ship internal tooling faster prompting, iterating, and validating end-to-end.
- Supervised a Service Desk team of 7–8 staff and facilitated 30+ recruitment processes including screening, scheduling, and onboarding.
- Designed onboarding process and training plans using SWOT analysis to identify and address operational gaps.

AI Tools & Automation Consultant (Remote) (Sep 2024 – Jan 2026)

- Generated UI wireframes via **prompt engineering** with generative AI tools, translating business requirements into developer-ready visual concepts.
- Built a custom attendance tracking system using IP & geo-validation, automating Excel-based reporting and eliminating a manual daily process.
- Provided consulting leadership for IT projects including requirements gathering, sprint planning, and delivery tracking in Jira and Slack.
- Applied MoSCoW and RACI frameworks to prioritise deliverables; acted as single point of contact between clients and development teams.

IT Support Intern – Liberty360, Leeds (May 2024 – Aug 2024)

- Developed a customised SharePoint environment, streamlining internal workflows and improving document transparency.
- Integrated automation tools for routine tasks, measurably increasing operational efficiency across departments.

Team Lead – Soul Food Groups, Leeds (Oct 2022 – Jun 2024)

- Supervised 20+ front-line staff across shifts, ensuring smooth operations and daily KPI achievement.
- Produced data-driven sales and operational reports; designed and implemented onboarding and mentorship systems.

PROJECTS

- **Talk-to-PDF (RAG System):** End-to-end **RAG pipeline** PDF ingestion, embeddings, FAISS vector store, and Claude/OpenAI API for source-grounded Q&A. Built with Python and LangChain.
- **AI Chatbot:** Multi-turn conversational assistant using **OpenAI/Claude API** with custom prompt engineering scoped, built, and iterated independently, not a tutorial.
- **Azure Cloud Data Pipeline:** Provisioned Resource Group, configured Blob Storage, set up Azure SQL Server, deployed **Azure Data Factory** pipeline automating data movement from Blob Storage to SQL Server.
- **AI Travel Planner (MERN Stack):** Full-stack app with geo-location APIs and an **LLM-powered chatbot** via prompt engineering for personalized itinerary recommendations.
