PROFESSIONAL SUMMARY

M.S. Data Science graduate with foundation in Computer Science, AI Engineering, Azure Cloud, and Business Analytics. Experienced in building data pipelines, designing prompt libraries for AI agents, delivering financial analysis, and leading cross-functional teams in Agile environments.

SKILLS

- AI: LLM Prompt Design, AI Agent Development, Prompt Library Management, Model Response Validation
- Cloud & Data: Microsoft Azure (Resource Groups, Blob Storage, Azure Data Factory, SQL Server, Data Pipelines), SQL
- Analytics & Reporting: Tableau, Power BI, R, Excel, KPI Dashboards, Forecasting
- Project Management: Agile/Scrum, Sprint Planning, MoSCoW, BPMN, RACI, OKRs, Value Stream Mapping, Jira, Taiga, Slack
- Collaboration: SharePoint, MS 365 Suite, Google Sheets, Process Documentation, Business Case Writing

EDUCATION

M.S. Data Science - Business Analytics Track

University of West Florida (May 2026)

BSc (Hons) Computer Science

Leeds Beckett University (Jun 2024)

EMPLOYMENT HISTORY

Data and AI Support Specialist - University of West Florida (Jan 2025 - Present)

- Design and manage financial dashboards and revenue forecasting reports (Tableau, Excel) for university leadership decisions.
- Use R, SQL, and Excel VBA macros day-to-day to automate data pulls and analysis, freeing up time that used to go into manual reporting and keeping dashboards accurate for leadership.
- Use AI image generation tools to create visuals for marketing materials, training plans, presentations.
- Supervise a Service Desk team of 7–8 staff while managing departmental administrative operations.
- Facilitated 30+ recruitment processes, including candidate screening, interview scheduling, and onboarding.
- Designed onboarding process and training plans using SWOT to address gaps.
- Coordinate cross-department operations, ensuring smooth workflow and comprehensive documentation processes.

Consultant – Project Manager & Operations (Remote) (Sep 2024 -Jan 2026)

- Provide consulting leadership for IT projects, including UI requirements gathering, sprint planning, and delivery tracking.
- Led front-end delivery by generating UI designs and wireframes through prompt engineering with generative AI tools, translating business requirements into visual concepts handed directly to developers bridging the gap between stakeholder vision and technical execution.
- Apply MoSCoW and RACI to prioritize work and define clear responsibilities.
- Act as single point of contact between clients and development teams for deliverable coordination.
- Developed a custom attendance tracking system using IP & geo-validation, automating Excel-based reporting.
- Guide cross-functional teams using Agile practices with Taiga, issue tracking in Jira, and communication via Slack.

IT Support Intern - Liberty360, Leeds (May 2024 - Aug 2024)

- Developed customized SharePoint environment, streamlining internal workflows and improving document transparency.
- Spearheaded integration of automation tools for routine tasks, significantly increasing operational efficiency.
- Gained practical experience in secure information sharing and interdepartmental collaboration processes.

Team Lead - Soul Food Groups, Leeds (Oct 2022 - June 2024)

- Supervised 20+ front-line staff across shifts, ensuring smooth operations and daily KPI achievement.
- Designed and implemented comprehensive onboarding and mentorship systems.
- Produced detailed sales and operational reports and proposed data-driven solutions.
- Took ownership of compliance logs and shift analytics for operational performance optimization.

PROJECTS

- Built Azure cloud data architecture: Provisioned Resource Group, configured Blob Storage, set up Azure SQL Server, and deployed an Azure Data Factory pipeline to automate data movement and transformation from Blob Storage to SQL Server
- Built travel planner using MERN Stack, integrating geo-location APIs and AI-powered chatbot with prompt engineering for personalized recommendations
- Delivered wireframes, MoSCoW prioritization, and risk assessment to structure requirements and guide development
- Completed an 8,000+ word research and methodology report, covering AI system design, business analysis, and evaluation
